

LAKELAND TERRIER

- 1 Brush the coat with a pin brush.. Then comb through to remove any mats..
- 2 Clean the ears by dusting the inside with medicated ear powder pulling out dead hair with your fingers..
- 3 Cut the nails with a scissors type nail clipper removing only the tips of the nails so as not to cut the quick..
- 4 Scissor the hair from between the pads of the feet..
- 5 Clip the hair from the rectum area (about half an inch either side of the rectum) Never put the blade in direct contact with the rectum..
- 6 Clip the hair from the stomach area (from the groin to the navel)..
- 7 Bathe and cage or fluff dry..
- 8 Start at base of the skull and strip down the back to the base of the tail. Then strip the entire tail.
- 9 Strip down the sides of the neck to the shoulder and then to the elbow in the front.
- 10 Strip down the side of the body to the flank in the rear and over the hip line on the hind legs.

- 11 Strip evenly down the chest and shoulders to the arm in the front and the elbow at the side. Use the breastbone as your guideline for the chest.
- 12 Comb the hair on the face forward and clip from one quarter of an inch behind the eye socket to the base of the skull.
- 13 Strip the from the outside corner of the eye to the base of the ear. Then clip from the corner of the eye down the cheek.
- 14 Strip the ears clean on outside from the base out.
- 15 Scissor around the outside edges of the ears to give them a clean appearance.
- 16 Comb the hair on the face forward and scissor the eyebrows diagonally from the outside corner to the inner corner of the eyes. exposing the eyes. Do not scissor the hair between the eyes, but allow it to grow down the top of the muzzle.
- 17 Comb the beard forward and thin out the line from the corner of the mouth to the corner of the eyebrow with your thinning shears so that it appears straight.
- 18 Thin and shape the beard with thinning shears to give it a long clean (barrel shaped) look.
- 19 Scissor the front legs to appear absolutely straight. Leave the leg full and rounded (cylinder shaped).
- 20 Strip the underchest to follow the contour of the dogs body inclining slightly from a point at the elbow to the flank.
- 21 follow the contour of the rear legs and shape the hair with thinning shears. Blend the hair at the hip in with the leg.
- 22 Trim the forechest slightly with thinning shears so that it lies evenly .
- 23 Scissor around the outside edges of the feet to round them off giving them a neat appearance.
- 24 Apply a lanolin coat conditioner by first putting a small amount on your hands and then rubbing it onto the coat.

The Lakeland Terrier should be bathed and groomed every six or eight weeks. The ears should be cleaned weekly and the nails should be checked monthly to see if they need clipping.
